readLine()
unmark 1
input
Syntax has been parsed and index 1 is valid.
File operations are assumed to succeed.
execute(activities, storage)
getByDisplayedIndex(1)
activity
setDoneAtDisplayedIndex(1, false)
getByDisplayedIndex(1)
isDone()
current completion
alt
[completion already equals false]
changed = false
[completion differs]
setDone(false)
changed = true
CommandResult(message, false, changed)
opt
[result.didChangeActivities()]
save(activities)
saved
showMessage(result.getMessage())
result message
No change returns an already-in-that-state warning.
Invalid indexes are reported without changing or saving data.
